MODEL RF IDEAL IN SITUATIONS WITH LIMITED WORKING SPACE

2-way Auto Cable Feed

3-Element Tri-Max Cable

The strongest cable on the market is stress-relieved Tri-Max 3-element cable.

It contains an inner core cable made from right-hand wound galvanized aircraft wire, a protective plastic sheath that guards against rust and corrosion and a tough, long-lasting outer layer of left-hand wound wire offering the same quality and tensile strength as music wire.

Standard Tools

1. 2-way auto cable feed advances and retrieves cable with the push of a lever.
2. Cable guide spring keeps hands off rotating cable for added safety.
3. Heavy-duty 1/3 H.P. Baldor capacitor start motor.
4. Rugged frame constructed of 1-1/4" steel tubing.
5. Snap-lock couplings (the same used on the Model C and standard Model R) hold tools firmly in place – no screws to come loose or rust.
6. 12" Flex Leader helps negotiate bends and traps.
7. Easy-to-remove belt guard makes maintenance and repair easier.
8. Large 10" wheels for easy maneuvering.
9. Easy-to-use air operated foot switch allows use of both hands when working with cable.
10. Built-in GFCI with 20 ft. power cord.
11. Reinforced cable cage totally open for quick inspection and cleaning.
12. Runs the industries toughest TRI-MAX cable in 5/8" or 3/4" diameters in lengths up to 100 ft.

Model RF Standard Kit (RFK-3/4IC100)

- Model RF 1/3 H.P. machine
- 2-way auto cable feed
- Cable guide spring
- 3/4" x 100' Tri-Max cable
- Set of (4) cleaning tools
- 12" flexible leader
- SC-18 Spanner Wrench
- Leather gloves
- Tool bag
